4.00 Services to be Provided

The successful bidder must provide all medical services and supplies (including pharmaceuticals) necessary to prevent health problems at the CCNO, to maintain and improve the health of all inmates at the Correction Center and to develop and implement policies and procedures designed to achieve these objectives, all in compliance with the “Standards for Healthcare Services in Jails” promulgated by the American Correction Association (ACA) and the Ohio Jail Standards. The medical services and supplies to be provided are described in more detail in the following sections.

4.01 Pre-Admission Screening

a. A pre-admission review of all inmates brought directly to the facility by the arresting officer must be made by a physician, registered nurse, or licensed practical nurse to ascertain their suitability for admission to the CCNO.

b. A receiving screening examination must be performed on all inmates upon their arrival at the CCNO. The exam must be conducted as part of the booking process (but not more than two (2) hours after an inmate’s arrival) by a physician, registered nurse or licensed practical nurse and must include physical and behavioral observations and inquiry into the inmate’s medical, dental and mental health condition using an instrument submitted and approved by the Executive Director of the CCNO.

c. Upon recognition of any problem requiring immediate treatment, appropriate referral must be made to a physician for further evaluation or treatment. If the screening reveals any infectious
disease, the affected inmate must be placed in medical isolation until it is determined by medical staff that the inmate’s condition allows placement in the general Correction Center population. This determination is subject to review by the facility’s Classification Committee in conjunction with the medical staff.

4.02 Health Appraisal

a. A health examination must be completed on each inmate within fourteen (14) days of the inmate’s arrival at the CCNO by a physician or nurse and must include physical and behavioral observations and inquiry into the inmate’s medical and mental health condition using an instrument submitted and approved by the Executive Director of the CCNO.
b. Upon recognition of any problem requiring immediate treatment, appropriate referral must be made to a physician for further evaluation or treatment.
c. If the screening reveals any infectious disease, the inmate must be placed in medical isolation unless it is determined by the medical staff that the inmate’s condition allows placement in the general CCNO population. This determination is subject to review by the facility’s Classification Committee in conjunction with medical staff.
d. Such examination must include administration of a Mantoux test for tuberculosis and screening for communicable diseases, sexually transmitted diseases, heart disease, drug or alcohol addiction, diabetes, hepatitis and any other disease or condition as deemed necessary by the person administering the examination.

4.03 Physician’s Services

a. A physician must act as the Medical Director. The Medical Director is responsible for the clinical direction, supervision and control of all persons providing medical services at the CCNO. The bidder must also appoint a person with authority to act on behalf of the Medical Director in the Medical Director’s absence.
b. A physician/NP/PA must be scheduled to conduct a daily inmate sick call clinic. Sick call clinics must be held a minimum of four (4) days per week and a minimum of twenty (20) hours per week.
c. A physician/NP/PA must be on call twenty-four (24) hours per day, seven (7) days per week within fifteen (15) minutes of the call. If the physician fails to contact the CCNO within fifteen (15) minutes, the medical staff on duty must have the authority to arrange immediate transportation of the affected inmate to an appropriate medical facility for treatment.
d. Notwithstanding the availability of an on-call physician, if in the opinion of the medical staff on duty a life threatening or medically urgent situation exists, medical staff on duty must have authority to arrange immediate transportation of the affected inmate to a hospital or other medical facility for treatment without first securing the opinion or authority of a physician.

4.04 Nursing Services

a. Routine nursing services must be provided twenty-four (24) hours per day, seven (7) days per week. These services must be provided by a registered nurse or a licensed practical nurse; however, a registered nurse must be on duty full time at least seven (7) days per week.
b. Nursing services during the remaining sixteen (16) hours of each day (e.g. 4:00 p.m. to 8:00 a.m.) must be provided by a registered nurse or licensed practical nurse. Additional medical or clerical personnel must be provided if the forgoing staffing proves inadequate to provide the services described herein.

4.05 Daily Triaging of Complaint

Health complaints from inmates must be processed at least daily as follows:
a. Healthcare personnel must solicit and act upon all complaints and make referrals to appropriate healthcare providers as necessary.

b. Medical Triage Forms must be collected by medical staff once each twenty-four (24) hours. Medical Triage Forms must be separate from other inmate request forms.

c. The responsible physician must determine the appropriate triage mechanism to be used for specific categories of complaints. After triage, if the medical staff has determined not to further examine any inmate requesting sick call or review of a medical complaint, the medical staff must document on the medical record the reasons for the decision and the person making the triage decision.

d. All inmates requesting medical review or treatment must be examined by professional medical staff within twenty-four (24) hours of the request unless determined by medical staff to be life-threatening and/or of an emergency nature, in which case the appropriate immediate action must be undertaken by medical staff.

e. The bidder must obtain and provide a second medical opinion on an inmate’s medical needs when required to ensure the quality of service or to reduce liability exposure. Such opinion must be at the cost of the bidder.

4.06 Sick Call

Routine diagnosis and treatment of minor health problems must be handled through a nurse sick call system or by written treatment protocols.

4.07 Infirmary Care

a. The CCNO contains a six (6) bed special segregation section in which inmates under medical care may be isolated. An additional twelve (12) bed section is designated for other administrative segregation which may include minor medical or psychological needs.

b. The bidder will be expected to utilize these sections to isolate/segregate inmates for medical and psychological reasons to the extent possible to reduce the necessity for hospital care.

c. If an inmate is placed in medical segregation or isolation, the medical staff must supervise and monitor that inmate in the Medical Infirmary Unit on a continuing basis, and the Corrections Commission staff will be available for security purposes as necessary to ensure safety of medical personnel.

d. Such inmates must be examined by the physician/NP/PA on a regular basis to assess their medical condition and to determine the need for continued segregation/isolation. Such determinations must be made in consultation with assigned mental health workers when appropriate.

4.08 Hospital Care

a. The bidder must make such arrangements as it deems necessary and must provide for appropriate hospital care when hospitalization of an inmate is required for illness or injury. The bidder must provide notice to security personnel in order to make necessary arrangements for providing security to hospitalized inmates. Following hospitalization, the bidder’s responsibilities include, but will not be limited to, consulting and specialist physician treatment and related medical services necessary for the inmate’s hospital care.

b. Subject to the aggregate annual cap described below, the bidder’s financial responsibility for hospitalization extends for a forty-eight (48) hour period after the inmate leaves the CCNO, after which time the sentencing jurisdiction assumes the financial obligation. The bidder must specify in its proposal any limitations on its financial liability for prolonged (up to the 48-hour hospitalization limit), catastrophic, epidemic or multiple inmate treatment incidents.
c. All medical bills must be reviewed prior to payment, and tracked by jurisdiction of arrest. The bidder is required to notify the Corrections Commission of the expiration of the initial 48-hour period and to continue cost control measures thereafter. The bidder must appoint a quality assurance individual to review in-hospital charts for length-of-stay purposes.

4.09 Specialty Services

The bidder must provide on-site specialty clinics when feasible to reduce the number of off-site referrals for specialty consultations. The bidder must be responsible for all costs associated with all specialty visits except those for security and routine transportation when an off-site specialty consultation is necessary.

4.10 Preventive Care

Preventive care must be provided, including health education and necessary inoculations and immunizations and instruction in self-care for chronic conditions in order to take advanced measures against disease. The preventive care contemplated must be detailed in the proposal.

4.11 HIV Counseling

HIV counseling and testing must be provided to any inmate who requests such counseling, provided that the inmate will be incarcerated a sufficient length of time to receive the test results during face to face counseling. All HIV drug therapy will be included under the aggregate cap.

4.12 Ancillary Services

Routine laboratory and minor x-ray procedures must be performed on-site to the extent possible. Procedures beyond the capabilities of the on-site equipment must be referred to outside providers at the cost of the bidder.

4.13 Dental Care

The following dental services must be provided to all inmates:

a. Dental evaluation within fourteen (14) days of admission;

b. Twenty-four (24) hour per day emergency dental treatment, not limited to extraction, when the health of the inmate would be adversely affected as determined by the dentist;

c. Dental and oral care provided by a Dentist licensed in the State of Ohio.

4.14 Medical Records

The bidder must maintain and provide the Corrections Commission with an individual medical record for each inmate, which must be kept up-to-date at all times. Each inmate's medical record must include documentation of all treatments, patient-perceived problems, examinations, diagnoses and medications administered. A transfer summary copy of the record must be forwarded to the appropriate facility in the event of transfer of the inmate. All inmate rights concerning the confidentiality of the medical record must be maintained. The bidder must share information from inmate medical records with authorized Corrections Commission administrative personnel.

4.15 Pharmaceutical and Medical Supplies

Pharmacy services capable of meeting the needs of all inmates in the facility must be provided at the expense of the bidder. All medicines must be administered in unit doses. All prescription medicines must be ordered by the responsible physician/NP/PA and administered by medical services personnel.
Records of all medications administered and formulary of approved medications and supplies must be maintained at the CCNO by the bidder. All such records and formulary are the property of the Corrections Commission. Strict controls of pharmaceutical and medical supplies must also be maintained.

The bidder must provide that medication be administered in such manner as to require the medical staff to positively identify the inmate to whom the medication is administered and to permit the medical staff to allow a full frontal view of the inmate as the inmate ingests the medication.

Inmates entering the CCNO bringing their own medication with them may be permitted to continue taking such medication. However, the facility medical staff will immediately review the continuing need for such medication, and if medically necessary, verify the prescription and take the necessary action to dispense the appropriate medication, beginning with the next scheduled dose. The Medical Director must develop a policy to dictate the appropriate procedures where verification cannot immediately be obtained.

4.16 Special Medical Programs
