

## **Request for Qualifications**

The Corrections Commission of Northwest Ohio ('Commission') wishes to contract with an experienced architectural and engineering design firm for technical assistance in the design and implementation of a solution for the Upgrade and Renovation of C Unit within the Corrections Center of Northwest Ohio ('CCNO').

The existing unit was built in 1990 and is a two story inmate cell unit with a slab, and attic over the cells. Currently there are forty-eight (48) dry cells with doors, and no electromechanical locks. The Upgrade and Renovation of C Unit cells will need a flush toilet, lavatory with hot and cold potable water, and heavy duty doors with electromechanical locks that open, with the Stanley Commander panel added. The Commission is open to single, double bunking, and three (3) person dorms. All work must meet the Ohio Minimum Standards for Jails and the Ohio Revised Code. The Design Professional will be required to provide all necessary and required design services. The Commission wants a Design Professional that will assist with the budget development, subject to the Commission's approval. A combination of local and grant funds are being used. The deadline for the gran submission is June 30, 2021.

The Commission is seeking statements of qualifications for Design Professional Services from interested firms to enter into a contract for structural engineering services for the project referenced above. All firms interested should reply with a statement of qualifications no later than Monday May 10, 2021 at 2 p.m. Statements received after this deadline will not be considered. Mailed or emailed submissions will be accepted.

Send mailed submissions to:  
Corrections Center of Northwest Ohio  
Attn: Accounts Purchasing Assistant  
03151 County Road 24.25  
Stryker, OH 43557
